CONFERENCE CHAIRMAN MESSAGE

“**JUBCOR 2019 Conference** is designed to cover **key areas** and **issues** related to corrosion, challenges and solutions to **protect** our **communities** and **industrial manufacturing facilities** from **corrosion impact**”

DR. SAUD AL SUBAI
NACE Jubail Saudi Arabia

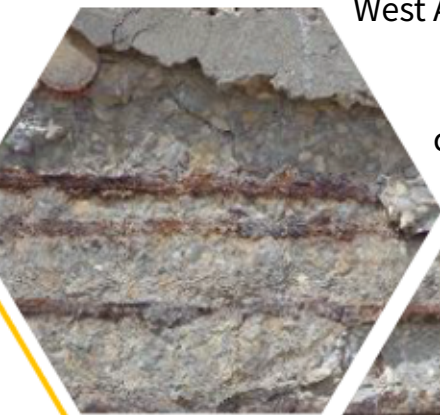

Ensuring integrity and reliability of plant equipment and other metallic assets is of key importance in manufacturing sites where their assets integrity and operations faces serious threat from corrosion. Hereafter, there is a great need to combat such challenges in time using innovative and state-of-the-art corrosion management systems and preventive technologies that would enhance and ensure the assets reliability and integrity.

Jubail Corrosion Conference (JUBCOR) is an annual conference and exhibition that will be held on 15–17 April 2019 at Jubail Industrial City, Kingdom of Saudi Arabia. The event is organized by NACE Jubail Saudi Arabia Section, a local section of the NACE West Asia and Africa Area.

issues related to corrosion, challenges and solutions to protect our communities and industrial manufacturing facilities from corrosion impacts. JUBCOR 2019 will present Asset Reliability and Corrosion Management Systems, High Temperature Corrosion Challenges, Industrial Water Systems Corrosion Management, and Nonmetallics. Participants in this important gathering will be from industry leaders, corrosion experts, technology and services providers, relevant manufacturers, and academia.

Thus, NACE Jubail team is quite confident that the conference will be an excellent opportunity to exchange technical knowledge, experiences, introduce new technologies and latest developments in corrosion science and engineering.

JUBCOR 2019 conference is designed to cover key areas and

NACE JUBAIL SAUDI ARABIA SECTION

NACE Jubail is a local section of the West Asia and Africa Area of the National Association of Corrosion Engineers (NACE) International. NACE Jubail was established in July 2008 to promote the awareness of corrosion and its control in Al-Jubail and its extended adjoining area of Saudi Arabia. The association plays an important role in this area since the area is recognized to have one of the highest concentrations of major industries in the world.

NACE-Jubail is setup at a time when the area is in the midst of a massive program of development to establish the second phase of the industries. NACE-Jubail is of direct relevance to these endeavors because quite a large number of structures with steel, reinforced concrete and pre-stressed concrete would be constructed in these projects of infrastructure development. Better quality materials or protective measures are required so that the structures have long life. On the other hand, the aging of infrastructure is one of the major problems faced by the existing plants in Jubail, most of which were built more than 20 years ago. The emphasis is now on maintaining and extending the life of these valuable assets.

It is a well-known fact that due to dissemination of information through local corrosion associations like NACE-Jubail, various innovative corrosion control measures can be promoted to industries. NACE-Jubail support such networking efforts that will enhance the service life of plants and structures

CALL FOR ABSTRACTS

JUBCOR 2019 is looking for abstracts on the following topics:

Asset Reliability and Corrosion Management Systems

- Advancements in Corrosion Management Techniques
- Corrosion Assessment, Inspection and Monitoring
- Optimization in Cathodic Protection
- Emerging welding technologies

High Temperature Corrosion Challenges

- Mechanisms and case histories
- Emerging technologies in Furnaces and Boilers
- High temperature coatings

Industrial Water Systems Corrosion Management

- Seawater cooling systems
- Boiler feedwater and Steam condensate
- Sewer systems

Nonmetallics

- FRP, Plastic and Concrete piping and equipment
- Construction challenges and limitations
- Composite Repairs

ABSTRACT SUBMISSION GUIDELINES:

- Abstract Submission Guidelines:
- Abstracts must be typed in English not exceeding 500 words and must be submitted online at jubcor.com/submitabstract.
- Abstracts should be based on any of the conference topic areas or related subjects.
- Extended Abstracts are required. It should contain the background, methodology, results, and conclusion. It should also contain at least 5 keywords.
- Abstract submission is only accepted through the NACE PaperTrail.
